DETAILED ACTION

Response to Amendment

Applicant's election of species I claims 1-3, 16 and 17 without traverse filed on December 21, 2005 is acknowledged.

Claims 1-3, 16, 17, 29-46 are pending.

Claims 4-15, 18-28 have been canceled.

Allowable Subject Matter

Claims 1-3, 16, 17, 29-46 are allowed.

The following is an examiner's statement of reasons for allowance:

After conducting a search none of the searched prior art alone or in combination discloses controlling the output of a laser diode having the structural combination of independent claim 1 and having the method steps of independent claim 16.

Regarding claims 1-3, 29-42,

None of the cited prior arts discloses the claimed structural combination of independent claim 1 with a detector, a comparator, an integrator, a DAC, where the comparator receives a measured output from the detector and in particular receiving a selected desired output from a write strategy generator.

Regarding claim 16, 43-46,

None of the cited prior arts discloses the claimed method steps of independent claim 16 with the steps of selecting, detecting, comparing, integrating, where the step of comparing compares a measured output and in particular compares a selected desired output from the step of selecting a desired output.

The closest references to Kiely et al (US 6,151,344), Ohashi (US 4,916,706), Daley (US 5,485,300) disclose a similar arrangement of a detector, comparator and integrator, but the references fail to disclose, suggest or imply selecting a desired output from a plurality of desired output for comparing with the monitored output.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
